Certificate Course- Organic farming

Introduction to the Course:

Organic Farming: Basic Details

In simple terms, organic farming is a system of farming where synthetic fertilizers, pesticides, antibiotics, modified seeds & organisms and growth hormones are not used.

It focuses on aspects such as – sustainability, improving soil fertility and improving biological diversity.

While avoiding synthetic fertilizers and pesticides, organic farmers use fertilizers of organic origin such as – manure, bone meal and compost manure.

Apart from that, organic farmers use techniques such as – crop rotation and companion planting in order to preserve soil fertility and keep the entire process sustainable.
